

PROFILE

Final-year Information Technology student specializing in **Frontend and Mobile Development**, with hands-on experience building responsive applications using **ReactJS**, **Next.js**, **TypeScript**, and **Flutter**. Experienced in RESTful API integration, state management, authentication, and role-based authorization. Seeking a **Frontend or Mobile Developer Intern** position to contribute to maintainable and user-friendly products while strengthening practical development skills.

EDUCATION

- **Industrial University of Ho Chi Minh City** Oct 2022 – Present
Bachelor of Engineering in Information Technology Ho Chi Minh City, Vietnam

PROJECTS

- **StayZ – Hotel Booking Application** Jun 2026 – Present
GitHub — *Flutter • Dart • RESTful APIs • PayOS • Render*
 - Developed a **Flutter hotel booking application** spanning **30+ routed screens**, with responsive interfaces and a modular, feature-based architecture.
 - Built **hotel search and filtering**, room selection, favorites, booking history, cancellation, notifications, and **post-stay reviews**.
 - Implemented a **6-stage booking flow** covering schedule, guests, room selection, payment, confirmation, and status tracking with PayOS.
 - Integrated **15+ RESTful API operations** with an existing Node.js/Express.js and MongoDB backend, including scoped environment, model, and API adjustments.
 - Developed **3 admin management modules** for users, bookings, and reviews, and supported backend configuration and deployment on Render.
- **Movie Booking Website** 2026 – Present
Live Demo — *ReactJS • Redux Toolkit • TanStack Query • Tailwind CSS*
 - Developed a responsive movie booking application with **customer and admin interfaces**, authentication, role-based authorization, and protected routes using ReactJS and Tailwind CSS.
 - Built movie search and filtering, trailer viewing, showtime selection, and **interactive seat booking** with automatic price calculation.
 - Integrated **Swagger-documented RESTful APIs** using Axios and TanStack Query for movie data, seat availability, ticket booking, and booking history.
 - Developed an **Admin Dashboard** for managing users, movies, and showtimes with CRUD operations, search, pagination, and image uploads.
- **Shoes Store** Jan 2026 – Feb 2026
Live Demo — *ReactJS • Redux Toolkit • TanStack Query • Tailwind CSS*
 - Developed a responsive e-commerce application with separate **customer and admin interfaces** using ReactJS and Tailwind CSS.
 - Managed client and server state using **Redux Toolkit** and **TanStack Query**, with RESTful API integration through Axios.
 - Implemented product search and filtering, cart, wishlist, checkout, inventory tracking, order processing, and product reviews.
 - Developed an **Admin Dashboard** for managing products, customers, orders, reviews, inventory, and sales statistics.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Dart
- **English:** TOEIC 500
- **Frontend & Mobile:** ReactJS, Next.js, Flutter, Tailwind CSS, Redux Toolkit, TanStack Query
- **API & Authentication:** RESTful APIs, Axios, JWT, Swagger
- **Tools & Deployment:** Git, GitHub, Postman, Figma, Vercel, Render
- **Backend Exposure:** Node.js, Express.js, MongoDB, Redis, Cloudinary, Socket.IO, PayOS
